

Counting camouflage

Look at the picture below. How many insects can you count?

- How many red insects are there?
- How many green insects are there?
- How many blue insects are there?
- How many yellow insects are there?

Next... look at the outline picture underneath the first one.

- Did you count them all?
- Did you miss any insects?
- What colour were the ones you missed?
- Why might you have missed them?

See the guidance card for information on why some insects were harder to find than others.
